ning of each regular issue of the PCT Gazette.*

(54) Title: AN INTERVERTEBRAL PROSTHESIS

(57) Abstract: The present invention relates to an intervertebral prosthesis. In particular, the present invention relates to an articulating intervertebral disc prosthesis. In use, the intervertebral prosthesis is fixed to the end plates of vertebrae following the surgical excision of a degenerative or ruptured disc. The intervertebral prosthesis has substantially flat bone engaging surfaces with a macro-textured surface.
